

QuickAid: Hyperlocal Trust-Based Human Assistance Coordination Platform

INTRODUCTION

- QuickAid is a hyperlocal mobile application designed to connect nearby people for short-duration physical assistance tasks.
- The platform helps users quickly find trusted nearby helpers for activities such as luggage shifting, grocery assistance, pickup/drop support, and temporary moving help.
- The application is mainly focused on environments like college hostels, apartments, and local communities where urgent nearby help is frequently needed.
- QuickAid provides flexible earning opportunities for students and local workers without requiring fixed jobs or long-term commitments.
- The platform uses a dual-sided trust system where both helpers and task seekers are verified and evaluated using trust metrics and completion history

MATERIALS AND METHODS

RESULTS

- The QuickAid platform successfully enables nearby users to coordinate physical assistance tasks in real time.
- The system improves rapid helper discovery for urgent nearby requirements.
- The trust system increases transparency and accountability between users.
- Controlled location-sharing improves user privacy and safety.
- The platform supports flexible earning opportunities for students and local workers.

DISCUSSION AND CONCLUSION

- QuickAid successfully demonstrates the use of hyperlocal technology for nearby human assistance and flexible earning opportunities.
- The dual-sided trust and verification system improves safety, transparency, and accountability for both seekers and helpers.
- The platform reduces dependency on personal social networks by providing a low-social-pressure environment for requesting temporary help.
- The real-time nearby matching system enables faster task coordination and improves response efficiency in hostels and apartment communities.
- QuickAid provides a scalable and user-friendly solution for trusted short-duration physical assistance .
- The platform creates independent part-time earning opportunities for students and local workers without requiring fixed employment or long-term commitments.
